

# Full-Stack Development Support for App Development Company

## PROJECT DETAILS

 Custom Software Development

 May. 2021 - Ongoing

 \$50,000 to \$199,999

“  
*They deliver high-quality code on time and have been well aligned with the requirements.*”

## PROJECT SUMMARY

designs.codes supports an app development company's full-stack development projects. They use React Native along with a backend API that was built for their current boilerplate.

## PROJECT FEEDBACK

designs.codes has passed good-quality code that is well-written and easily understandable for the client. These requests have also been well-documented and milestones have been met on time. Overall, everything they've submitted has been aligned with the client's requirements.

## The Client

Please describe your company and your position there.

I'm the CEO of a software company.

## The Challenge

For what projects/services did your company hire designs.codes, and what were your goals?

We hired designs.codes to support us with extra hands on multiple full stack development projects.

 **Vlad Niculescu**  
CEO, App Development Company

 **Software**

 **1-10 Employees**

 **Romania**

### CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

How did you select this vendor and what were the deciding factors?

We selected this vendor for their fast response times, seriousness, ability to understand our needs and price.

Describe the scope of work in detail, including the project steps, key deliverables, and technologies used.

We've worked on developing a mobile application using React Native among with a backend API built on top of our current boilerplate. Design.codes fully understood the requirements and was capable of delivering constant quality updates.

How many people from the vendor's team worked with you, and what were their positions?

3 people: 1 full stack developer 1 front end developer 1 account manager

## The Outcome

Can you share any measurable outcomes of the project or general feedback about the deliverables?

Deliverables are of very good quality, code is clean and well written, easily understandable by other developers. Pull requests are well documented. Milestones are met on time.

Describe their project management style, including communication tools and timeliness.

We have daily written standups + we have an ongoing conversation on slack that aims to clarify any requirement or challenge that occurs.

What did you find most impressive or unique about this company?

They deliver high-quality code on time and have been well aligned with the requirements.

Are there any areas for improvement or something they could have done differently?

No.
